BHAVA NARAYANA SRIKAR KOTIPALLI

Software Engineer | .NET | React | Angular | Azure | Microservices | Micro-frontends

Chennai, India | +91-9618182273 | kbnsrikar2273@gmail.com | linkedin.com/in/kbn-srikar/ Profile Website

Professional Summary

Full Stack Software Engineer with 4+ years of experience building web applications and SaaS platforms using .NET Core, React and Angular. Hands-on experience across REST APIs, microservices, micro-frontends, Azure/AWS, CI/CD and performance optimization. Experienced in building reusable frontend modules, optimizing high-volume data retrieval, developing scalable backend services, and collaborating with clients and cross-functional teams across the application lifecycle.

Technical Skills

- **Languages:** C#, JavaScript, TypeScript, SQL
- **Frontend:** React.js, Redux, Redux Toolkit, RTK Query, Angular, HTML5, CSS3, Bootstrap
- **Backend:** .NET 8, ASP.NET Core, REST APIs, Entity Framework Core
- **Architecture:** Microservices, Micro-frontends, Modular/Reusable Packages
- **Cloud & DevOps:** Azure, AWS, Azure DevOps, AWS Amplify, GitHub, CI/CD
- **Databases & Tools:** MySQL, Postman, Jira
- **Development:** AI-assisted software development, Agile/Scrum, Code Reviews

Professional Experience

Software Engineer | ValGenesis Pvt Ltd

Mar 2026 – Present

- Develop features for a workflow and custom-forms platform using React, Redux Toolkit, .NET 8, Azure and GitHub within a microservice-based architecture.
- Built new field-level chat functionality with an expandable chat box triggered through field interaction, improving the custom-form user experience.
- Packaged and published reusable custom-form functionality as a npm package for consumption by other application modules, supporting modular frontend development.
- Worked on a task-transfer workflow supporting transfer of single or multiple tasks between users across sites.
- Reworked existing task-transfer implementation to optimize result retrieval, implemented database indexes for faster data access, and resolved functional defects.
- Investigated transient failures in task-count retrieval at a dataset scale of approximately 3–5 million task records; identified scalability limitations and proposed a database architecture optimization while working within an Entity Framework-based data-access constraint.
- Use RTK Query to support API data fetching, caching and state management across React-based functionality.
- Collaborate with product, QA and engineering teams through Agile ceremonies, code reviews and production delivery.

Software Engineer | Psiog Pvt Ltd

Jul 2022 – Mar 2026

Client & Vendor Management System

React | JavaScript | .NET Core | MySQL | AWS | GitHub

- Designed, developed and maintained responsive React applications supporting business and end-user workflows.
- Improved component reusability, reducing redundant code by approximately 70% and improving maintainability and delivery speed.
- Optimized database queries and data-access patterns, improving query performance by approximately 25%.
- Contributed to a cloud-based SaaS platform supporting AI application deployment, batch jobs, scalable APIs and workflow orchestration.
- Designed and developed scalable .NET Core REST APIs using clean architecture principles.
- Developed proof-of-concepts including virtualization and React charts to improve application UX and technical feasibility.
- Implemented CI/CD pipelines using AWS Amplify and GitHub for reliable application deployments.
- Collaborated with client stakeholders on requirements, clarifications and delivery validation.

Asset Management System

Angular | TypeScript | .NET Core | MySQL | Azure DevOps

- Reduced application load time by approximately 75% through caching mechanisms and optimized data-fetching workflows.
- Designed and implemented scheduled background jobs using Quartz.NET for sensor-data backfills and daily updates, using .NET bulk-insert techniques for large-scale processing.
- Implemented IndexedDB on the frontend to store large datasets and improve UX for multi-tab workflows.
- Provided production and post-migration support during cloud platform transitions.
- Acted as a primary client contact for requirements gathering, clarifications and delivery validation.

Education

Vellore Institute of Technology, Vellore

Integrated M.Tech – Software Engineering

Jul 2017 – Apr 2022

CGPA: 8.28

Certification

- The Complete React JS & Redux Course – Udemy
